Operative note (Laparoscopic cholecystectomy) Phen Hospital

Date of operation..... Time started.....Time ended.....

Surgeon..... First Assistant ..... Second assistant.....

Clinical diagnosis.....

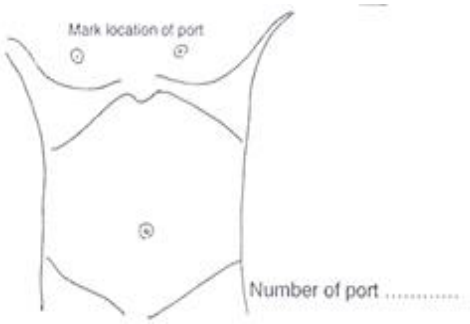

Post operative diagnosis.....

Operative procedure.....Laparoscopic cholecystectomy.....

Anesthesia..... Anesthesist.....Scrub nurse.....

Position.....Supine..... ☐ Other.....

Mark location of port

Procedure

- Xylocaine was infiltrated into the proposed incision site
- Entrance was gained into the abdomen using
  ☐ infraumbilical ☐Supraumbilical
- Vicryl stay sutures were placed in the fascia
- Camera port was inserted through the opening into the peritoneal cavity and was fixed by stay suture.

Finding

- The peritoneal cavity was then inflated with CO_2.
- Accessory port sites were created after LA was infiltrated.
- The fundus of the gallbladder was then grasped and flipped up and over the liver.
- The neck was retracted laterally and caudad, exposing The ductal structures, which were dissected out.
- The cystic duct was doubly clipped and transected as was the cystic artery.
- The gallbladder was then removed from the gallbladder fossa using electrocautery.
- Bleeding was checked and stopped.
- ☐ The gallbladder was removed from the abdomen (<u>without plastic bag cover).</u>
- Abdomen were closed.
- Suture skin by Nylon 3-0.

Gallbladder size .....cm

☐ contracted ☐ distended

GB wall ☐ thin ☐ thick

Adhesion around GB

☐ No ☐Yes.....

Adhesion around Calot's triangle

☐ No ☐Yes.....

Presence of Gallstone

☐ No ☐Yes.....
